AUDIT & CONSULTANCY

Integrity First. Every Time.

We say what we mean, and do what we say.

Know your numbers. See your risks. Move with confidence.

About Integra

Absolute integrity, backed by real technical competence.

Integra Audit & Consultancy is a Tripoli-based audit and advisory firm built on one uncompromising principle: absolute integrity, backed by real technical competence.

FOUNDER & MANAGING PARTNER

Clara Khoury Beayni

Certified Public Accountant (CPA), Member of LACPA

OUR MISSION

We audit, advise, and keep you compliant — turning the flow of your operations into numbers management can act on with confidence. A noble responsibility, and one we treat as such.

OUR VISION

To be a world-class audit and advisory firm and elevate the profession as a whole.

OUR VALUES

Integrity

We say what we mean, and do what we say.

Client-first

Our success revolves around yours.

Excellence

We hold ourselves to a higher standard, always.

Confidentiality

Your information stays protected. Discretion isn't a policy for us, it's a principle.

Quality

We raise the bar with every project we take on.

Passion

This work is a calling to us, not just a job.

Transparency

All is clear. All is simple.

Our Services

Every engagement is built around your business's actual risk profile — not a generic checklist.

01 External Audit

Independent assurance when shareholders, banks, and investors need confidence in your financial statements.

02 Internal Audit

A critical, independent look at your internal controls and processes — before risks become costly problems.

03 Tax Advisory & Compliance

Precision and foresight in your tax position, so compliance is never a scramble and exposure stays minimal.

04 Accounting & Bookkeeping

Meticulous financial records, giving you a real-time, reliable picture of where your business truly stands.

05 Business & Operational Consultancy

For businesses that have lost momentum — diagnosing what's broken across operations and finance, then rebuilding it.

06 SOP Development & Implementation

Clear, practical standard operating procedures that bring structure and consistency to how your business runs.

07 Business Assessment & Valuation

Rigorous, independent valuations — the clear-eyed analysis you need for a sale, an investment, or a merger.

08 Feasibility Studies

Independent analysis of the financial and operational viability of a new venture, project, or expansion.

HOW AN INTEGRA ENGAGEMENT WORKS

From conversation to action

01

Understand

A first conversation to understand what's prompting the engagement and what a useful outcome looks like for you.

02

Assess

Identifying where risk of error, misstatement, or inefficiency is concentrated, so effort goes where it matters.

03

Act

A clear, structured report or opinion — built to be useful to you, not just technically compliant.

BUSINESS HEALTH CHECK™

Business Health Check

A preliminary self-assessment to help you see where your business stands — across reporting, controls, tax readiness, cash, and operations.

Financial Reporting **Internal Controls** **Tax Readiness** **Cash Management** **Operational Structure**

This is a preliminary self-assessment tool, not an audit opinion, certification, tax opinion, professional assurance conclusion, or regulatory compliance determination. It's a starting point for a conversation, not a professional conclusion.

WORKING TOGETHER THROUGH THE PORTAL

Client Portal

Your assessments, reports and documents continue in the Client Portal.

Upload files and documents, receive reports, view tailored dashboards and communicate with Integra through your dedicated, secure Client Portal. Keep your documents, reports, dashboards and conversations organized in one place.
